## OUR POWER PRACTICE

With a market-leading practice, Watson Farley & Williams' specialist energy lawyers deliver high quality services on domestic and cross-border projects throughout the sector. We have delivered more than 800 successful power projects in over 50 countries, each affected by a complex array of legal and financial issues.

Ranging from 20 MW to over 1000 MW, the projects and transactions on which our expert lawyers advise covers virtually every fuel category – from conventional power, including coal- and gas-fired power plants, to renewables, such as onshore and offshore wind, solar, biomass, waste-to-energy, geothermal and a range of other non-conventional generation assets. We also deliver effective advice in the transmission, distribution and supply sub-sectors.

Around the world, the firm's dedicated energy and infrastructure lawyers advise energy companies, financial institutions, institutional investors, sponsors, governments and contractors.

Experienced and practical, our finance team advise on a range of financing techniques, including acquisition, project and lease financing, including structuring and security arrangements.

With significant experience across a range of corporate and commercial matters, our team specialise in M&A, joint ventures, construction and installation contracts, risk identification/mitigation, consortium issues, commercial contracts, corporate and asset acquisitions and the privatisation of state utilities.

Working to provide a full service to the industry, our team also delivers pragmatic advice in relation to dispute resolution, insolvency, bankruptcy and tax.
